

Coronavirus

(COVID-19)

COVID-19 (CORONAVIRUS) PREVENTION TIPS

WASH YOUR HANDS

STAY HOME IF SICK

CLEAN AND DISINFECT

AVOID CROWDED PLACES

We the AMIEU advise that we are in communication with the employers about the development of action plans and policies to help minimise the spread of infection.

We strongly recommended that all members use not only their common sense during this time but follow the advice from the health commission.

If you feel that your employer has not developed action plans and you have concerns for your health and safety, or the safety of others at your worksite please contact the union office.

As a result of trying to minimise the exposure to our officials we will limit visiting sites.

If members need us, we will come out. If you have a dispute or meeting that we need to attend we will attend.

Another measure we are taking to prevent the cross contamination and remove OH&S concerns is that we are suspending tool sales on site. Should you wish or need to purchase tools please call the union office to make alternative arrangements.

If you feel unwell you should at stay home.

Please ask your fellow members if they have received this notification. If not ask them to call the office to update their details. Moving forward this will be our most effective way to communicate messages to our members during this period of social distancing.

Any concerns you may have we encourage you to call the union office.
